Re: Tara Village Comprehensive Plan Text Amendment, Large-scale Comprehensive Plan Amendment (LsCPA) & Planned Development – Residential (PD-R) Rezoning

Dear Kathy:

CHW resubmits these revised Comprehensive Plan Text Amendment, LsCPA and PD-R application packages on behalf of our clients, Tara Village, Inc. The packages include the following for each application:

- Three (3) copies of each revised application packages; and
- One (1) CD-ROM with a PDF of the complete package for each application.

These revisions are submitted in response to the Development Review Team comments received on August 10, 2016. Below are statements summarizing how each comment was addressed.

LsCPA (Map) Application

1. The Needs Analysis on Pages 16-17 has been revised to base the population projection and current household information on more recent BEBR data.
2. The Site Suitability Analysis was revised to include regulated plant and animal species, all other on-site soils, wellfield protection zones, and historic structures.

Comprehensive Plan Text Amendment

1. The Needs Analysis on Pages 9-10 has been revised to base the population projection and current household information on more recent BEBR data.
2. The response to TE Objective 1.1 on Pages 11-12 has been revised to clearly state that CR 235 is the only affected roadway segment.

Rezoning Application

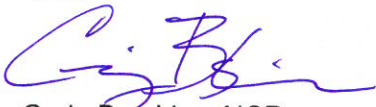

1. The response to Logical Development Pattern on Pages 13-14 has been revised to further explain that future development on Tax Parcel 03975-015-000 (which has been removed from the PD-R) will be consistent with the Agriculture FLU and zoning requirements or go through the process of amending these designations which would include public notification and a neighborhood workshop.
2. The response to Pre-mature Development on Pages 14-15 has been revised to base the population projection and current household information on more recent BEBR data.
3. The response to Not Deviate from Pattern of Development on Pages 16-17 has been revised to further explain that future development on Tax Parcel 03975-015-000 (which has been removed from the PD-R) will be consistent with the Agriculture FLU and zoning requirements or go through the process of amending these designations which would include public

notification and a neighborhood workshop. Compatibility with adjacent parcels is addressed in this response as well as throughout the entire report.

4. Sheet 2 of the PD Master Plan has been revised to replace references to LsCPA application with PD-R Rezoning application.
5. The response to Dimensional Standards on Pages 23-24 has been revised to further explain that future development on Tax Parcel 03975-015-000 (which has been removed from the PD-R) will be consistent with the Agriculture FLU and zoning requirements or go through the process of amending these designations which would include public notification and a neighborhood workshop.
6. The Site Suitability Analysis was revised to include regulated plant and animal species, all other on-site soils, wellfield protection zones, and historic structures.
7. The table on the PD Master Plan Sheet 1 has been revised to identify Common Area / Open Space as area (C).
8. Note 4 on the PD Master Plan Sheet 1 has been revised to indicate that approximately $\pm 31\%$ of the site will be Open Space.
9. Note 1 on the PD Master Plan Sheet 2 has been revised per staff's recommendation.

We trust this submittal is sufficient for your review, recommendation for approval, and presentation to the Planning and Zoning Board. Please contact me directly if you have any questions or need any additional information.

Sincerely,
CHW

Craig Brashier, AICP
Planning Manager

SPECIAL WARRANTY DEED

THIS SPECIAL WARRANTY DEED, made and executed as of the 22nd day of March, 2010 by A.A. Moukhtara Company, whose post office address is 7717 NW 20th Lane, Gainesville, FL 32605, ("Grantor"), to Tara Village, Inc., a Florida Corporation ("Grantee").

WITNESSETH that said Grantor, for and in consideration of the sum of Ten and no/100 (\$10.00) Dollars, and other good and valuable considerations to said Grantor in hand paid by said Grantee, the receipt whereof is hereby acknowledged, does grant, bargain, sell, alien, remise, release, convey and confirm unto the said Grantee, and Grantee's heirs and assigns forever, all of the following described land, situate, lying and being in Alachua County, Florida, to wit:

A tract of land situated in the NW ¼ of Section 27, Township 8 South, Range 18 East, Alachua County Florida, said tract of land being more particularly described as follows:

Commence at the Southwest corner of the aforementioned NW ¼ of Section 27, Township 8 South, Range 18 East for a point of reference and run North 01 deg. 12 min. 59 sec. East, along the West line of said Section 27, a distance of 1076.07 feet to an iron pipe and the True Point of Beginning; thence continue North 01 deg. 12 min. 59 sec. East along said West line a distance of 343.08 feet to an iron pipe, said iron pipe being 1229.42 feet South of the NW corner of said Section 27; thence run South 89 deg. 17 min. 43 sec. East parallel with the South line of said NW 1/4, a distance of 1238.91 feet to a concrete monument on the Westerly right of way line of Interstate Highway No. 75 (300 foot right of way); thence run South 21 deg. 27 min. 14 sec. East along said Westerly right of way line, a distance of 748.32 feet to a concrete monument; thence run North 89 deg. 17 min. 43 sec. West, parallel with said South line, a distance of 904.67 feet to a concrete monument; thence run North 01 deg. 12 min. 59 sec. East, parallel with said West line of Section 27, a distance of 350.00 feet to a concrete monument; thence run North 89 deg. 17 min. 43 sec. West, parallel with said South line, a distance of 622.68 feet to the True Point of Beginning.

Subject to restrictions, reservations and easements of record, (except that this reference shall not act to reimpose the same) and taxes for the current and subsequent years.

Together with all the tenements, hereditaments and appurtenances thereto belonging or in anywise appertaining.

To have and to hold, the same in fee simple forever.

And the Grantor hereby covenants with the said Grantee that Grantor is lawfully seized of said land in fee simple; that Grantor has good right and lawful authority to sell and convey said land; that Grantor hereby fully warrants the title to said land and will defend the same against the lawful claims of all persons claiming by, through or under the said Grantor.

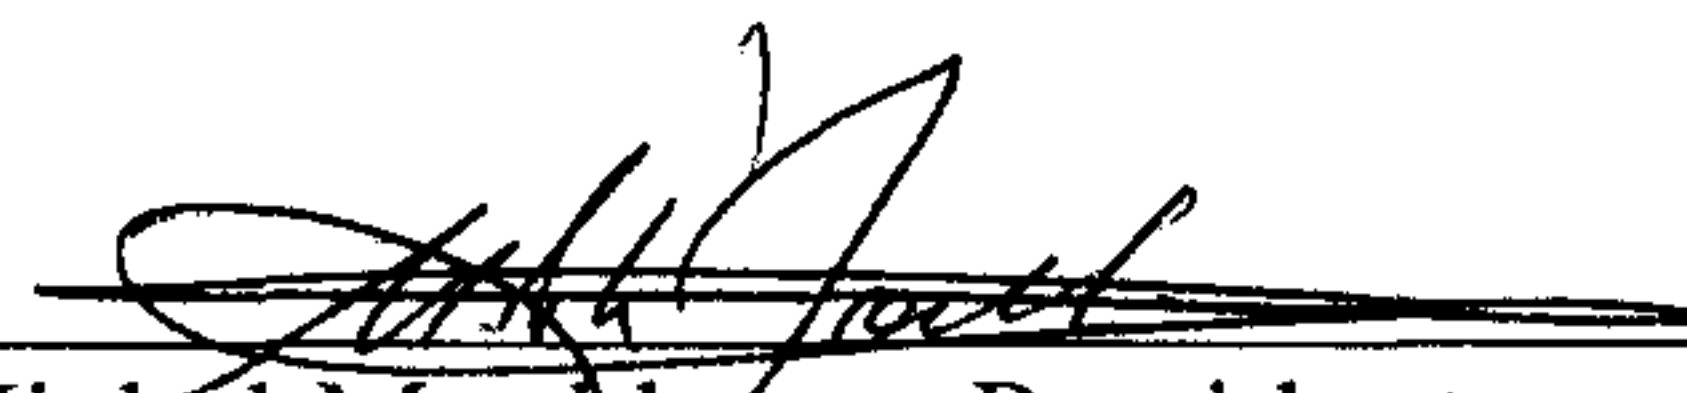

This deed was prepared without the benefit of a title abstract or survey.

“Grantor” and “Grantee” include the masculine and feminine and singular and plural as the context requires.

IN WITNESS WHEREOF, Grantor has hereunto set his hand and seal the day and year first above written.

Signed, sealed and delivered in our presence:

From: Craig Brashier, AICP, Planning Manager
Date: May 31, 2016
Re: Tara Village Comprehensive Plan Text Amendment Justification Report

<u>Jurisdiction:</u> City of Alachua	<u>Intent of Text Amendment:</u> Limit density on the Tara Village parcels to a maximum of 0.93 unit per acre.
<u>Description of Location:</u> Between NW 157 th Street and I-75, approximately one-half mile south of County Road 235	
<u>Parcel Numbers:</u> 03974-004-000 and 03974-005-000	<u>Acres:</u> ± 21.64 Acres (Source: Alachua County Property Appraiser's Office)
<u>Current Future Land Use Category:</u> Agriculture (A) Maximum Density: 1 unit per 5 acres	<u>Proposed Future Land Use Category:</u> Moderate Density Residential Maximum Density: 0.93 unit per acre* *Restricted by FLUE Policy 1.2.a.1
<u>Current Zoning Category:</u> Agriculture (A) Maximum Density: 1 unit per 5 acres	<u>Proposed Zoning Category:</u> Planned Development – Residential (PD-R) Maximum Density: 0.93 unit per acre = 20 total single-family units
<u>Proposed Text Amendment:</u> Future Land Use Element Policy 1.2.a.1: The moderate density residential land use designation on Alachua County Tax Parcels 03974-004-000 and 03974-005-000, as recorded in the Official Records of Alachua County Book 3944, Pages 1138 and 1147, shall be limited to a maximum density of 0.93 dwelling unit per acre. The permitted density on the referenced parcels shall be implemented in accordance with the City of Alachua's Land Development Regulations.	

NEED AND JUSTIFICATION

The proposed text amendment will limit the density on the two (2) parcels that make up the Tara Village site to 0.93 unit per acre. Companion to this text amendment is a Large-scale Comprehensive Plan Amendment (LsCPA) that will change the FLU designation from Agriculture to Moderate Density Residential. The Moderate Density Residential FLU permits a maximum density of 4 units per acre. Without the proposed text amendment, a maximum of 87 units would be permitted on the ±21.64-acre Tara Village site.

There is also a concurrent rezoning that seeks to change the Zoning Atlas for the ±21.64 undeveloped acres from Agriculture (A) to Planned Development-Residential (PD-R). The Tara Village PD-R will ensure a rural character, large-lot single-family subdivision, limited to twenty (20) single-family detached and platted lots.

The proposed 0.93 unit per acre density is consistent with and similar to adjacent residential development. The adjacent lots to the north in Shady Lane Acres are approximately 2 acres in size (a density of 1 unit per 2 acres). This is actually a density associated with the Moderate Density Residential (MOD) Future Land Use (FLU) category rather than the Agricultural FLU, which limits density to one (1) unit per five (5) acres. Further, the median Tara Village PD-R lot size will be substantially larger than the typical lot sizes to the west in Savannah Station which are as small as 4,050 ft² (45' x 90').

Table 1 below identifies the Future Land Use and Zoning designations surrounding Tara Village. Figure 1 on the following page identifies the subject parcels' general location. Figures 2 through 5 illustrate pre- and post-LsCPA and Rezoning Adoption Future Land Use (FLU) and Zoning categories.

Table 1: Surrounding Future Land Use and Zoning Designations

Direction	Future Land Use Designation	Zoning Designation
North	Agriculture (A)	Agriculture (A)
South	Agriculture (A)	Agriculture (A)
East	I-75 R.O.W.	I-75 R.O.W.
West	Moderate Density Residential (MOD)	Planned Development (PD) & Residential Single Family-1 (RSF-1)

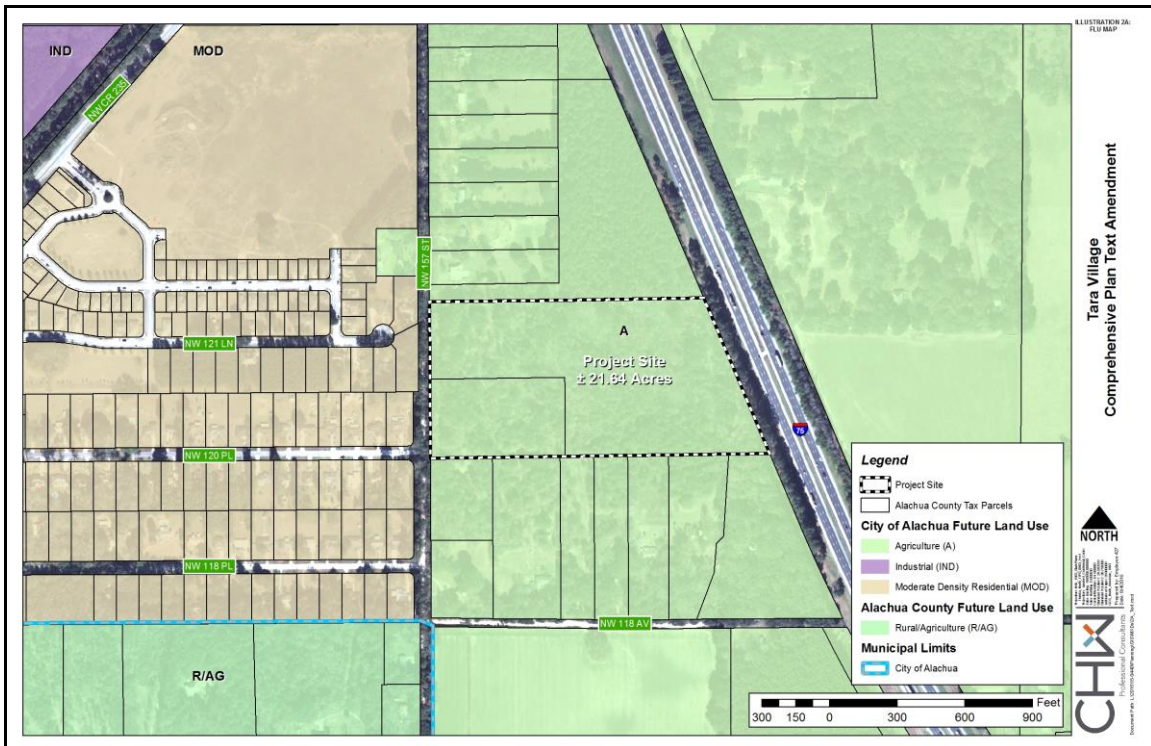

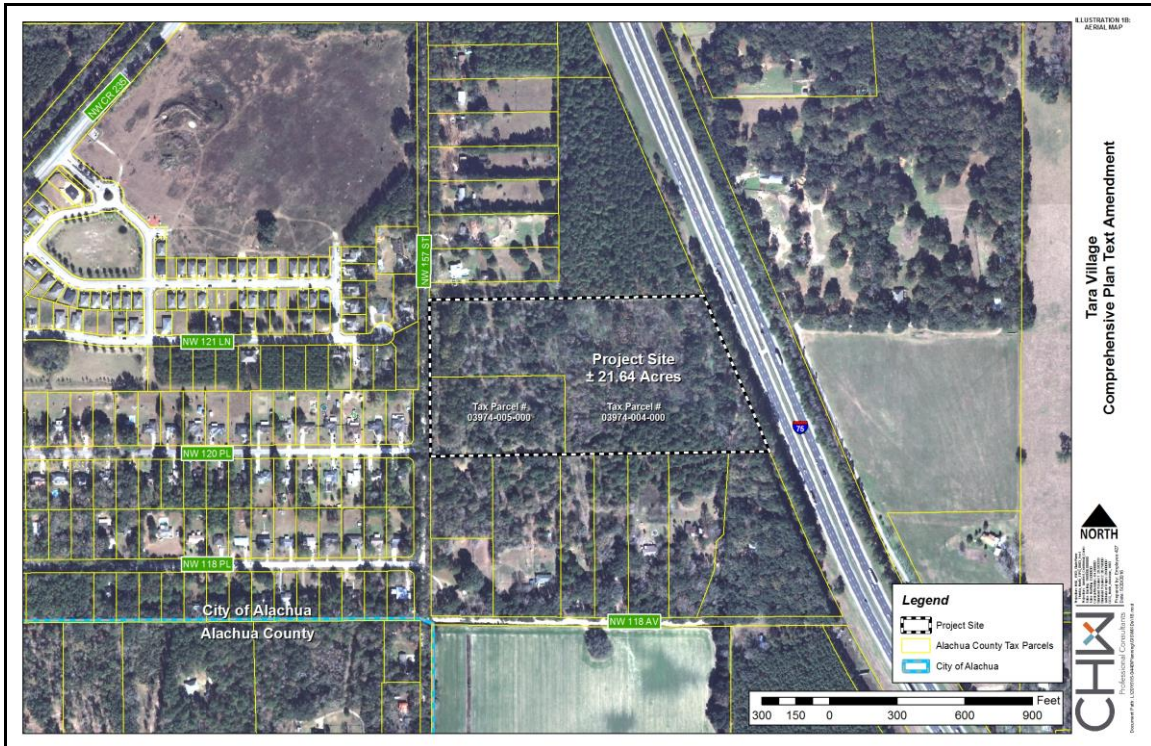

Figure 3: Proposed Future Land Use

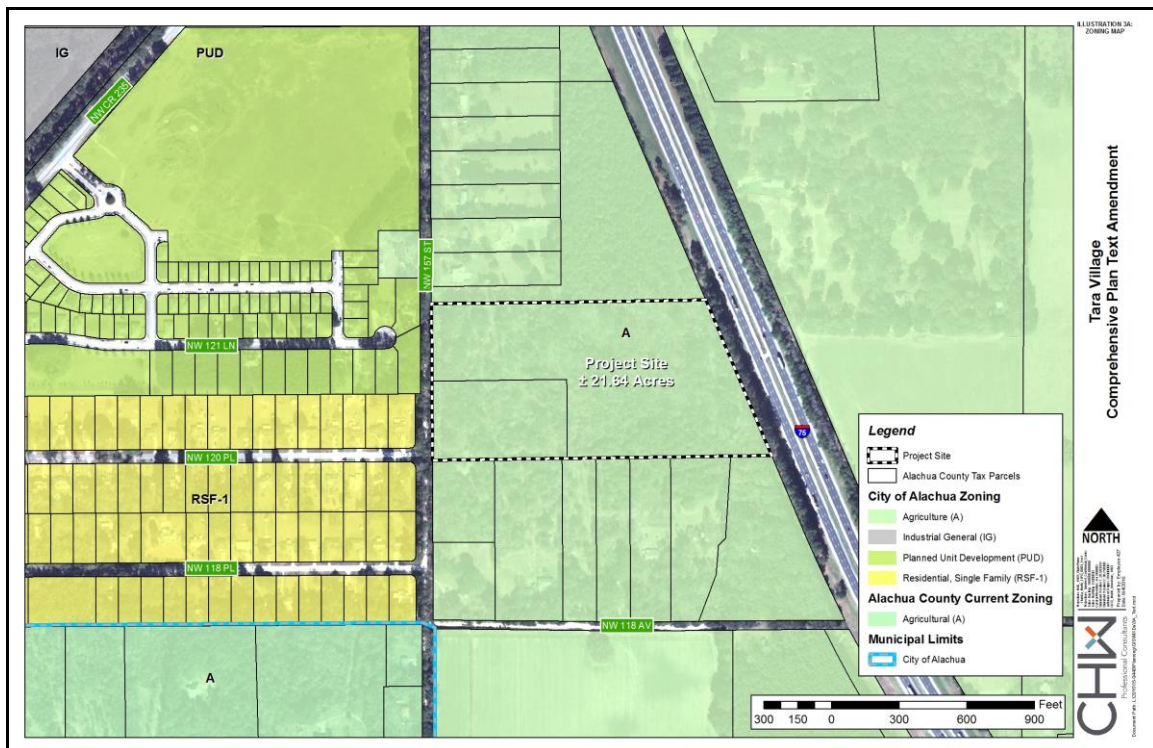

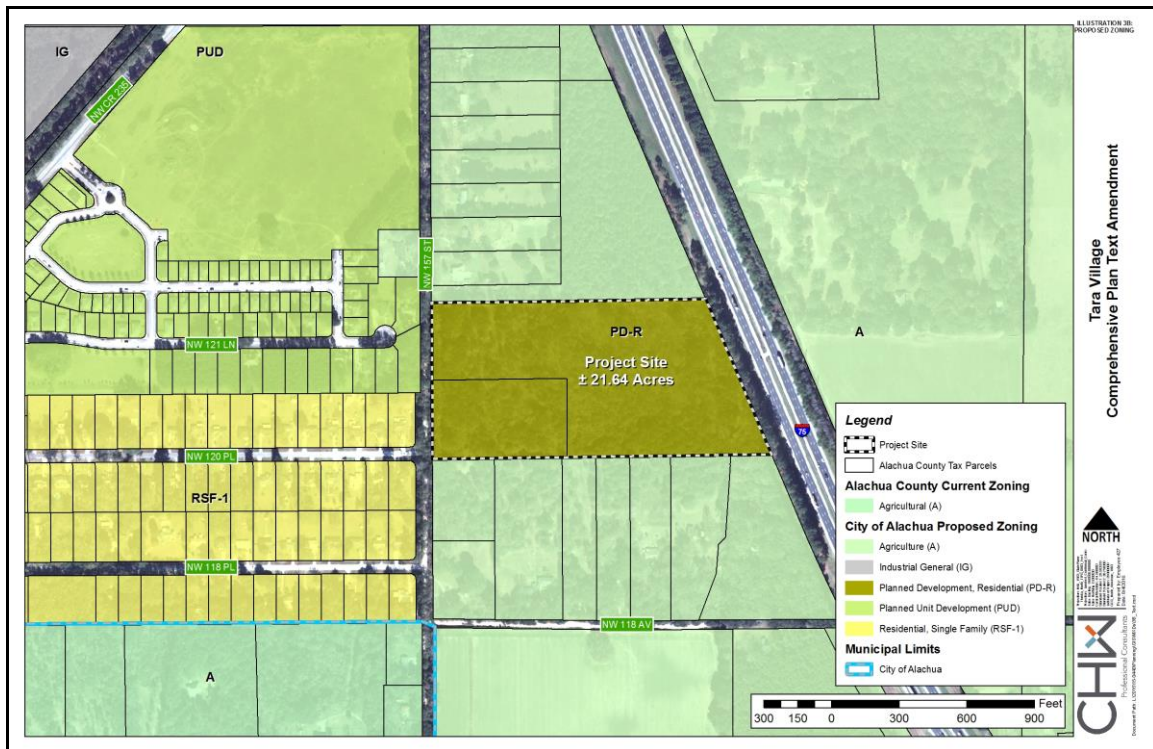

Figure 4: Existing Zoning

PROPOSED COMPREHENSIVE PLAN TEXT AMENDMENT

The proposed policy language is provided in underline format.

City of Alachua Comprehensive Plan
Future Land Use Element

GOAL 1: Future Land Use Map 2015: The City of Alachua shall maintain a Future Land Use Map in order to effectively guide development in a sustainable manner and to ensure economic prosperity and stability while maintaining a high quality of life for all of its present and future citizens.

Objective 1.2: Residential

The City of Alachua shall designate three Residential land use categories to ensure an orderly urban growth pattern that makes the best use of available lands for residential development.

Policy 1.2.a: Moderate density residential (0 to 4 dwelling units per acre):
The moderate density residential land use category allows residential development at a maximum density of 4 dwelling units per acre. The following uses are allowed in the moderate density residential land use category:

1. Single family, conventional dwelling units;
2. Accessory dwelling units;
3. Manufactured or modular homes meeting certain design criteria
4. Mobile homes only within mobile home parks;
5. Duplexes and quadplexes;
6. Townhomes;
7. Residential Planned Developments;
8. Supporting community services, such as schools, houses of worship, parks, and community centers

Policy 1.2.a.1: The moderate density residential land use designation on Alachua County Tax Parcels 03974-004-000 and 03974-005-000, as recorded in the Official Records of Alachua County Book 3944, Pages 1138 and 1147, shall be limited to a maximum density of 0.93 dwelling unit per acre. The permitted density on the referenced parcels shall be implemented in accordance with the City of Alachua's Land Development Regulations.

URBAN SPRAWL ANALYSIS

Chapter 163.3177, Florida Statutes, identifies eight (8) standards to help determine if a proposed amendment incorporates a development pattern or urban form that discourages the proliferation of urban sprawl. The amendment must achieve at least four (4) of the eight (8) standards to meet this determination. The proposed Tara Village Planned Development is consistent with the following four (4) standards:

1. Directs or locates economic growth and associated land development to geographic areas of the community in a manner that does not have an adverse impact on and protects natural resources and ecosystems.

Response: The Tara Village Development is not located within wetlands or within flood zones, as substantiated by Figure 6 below.

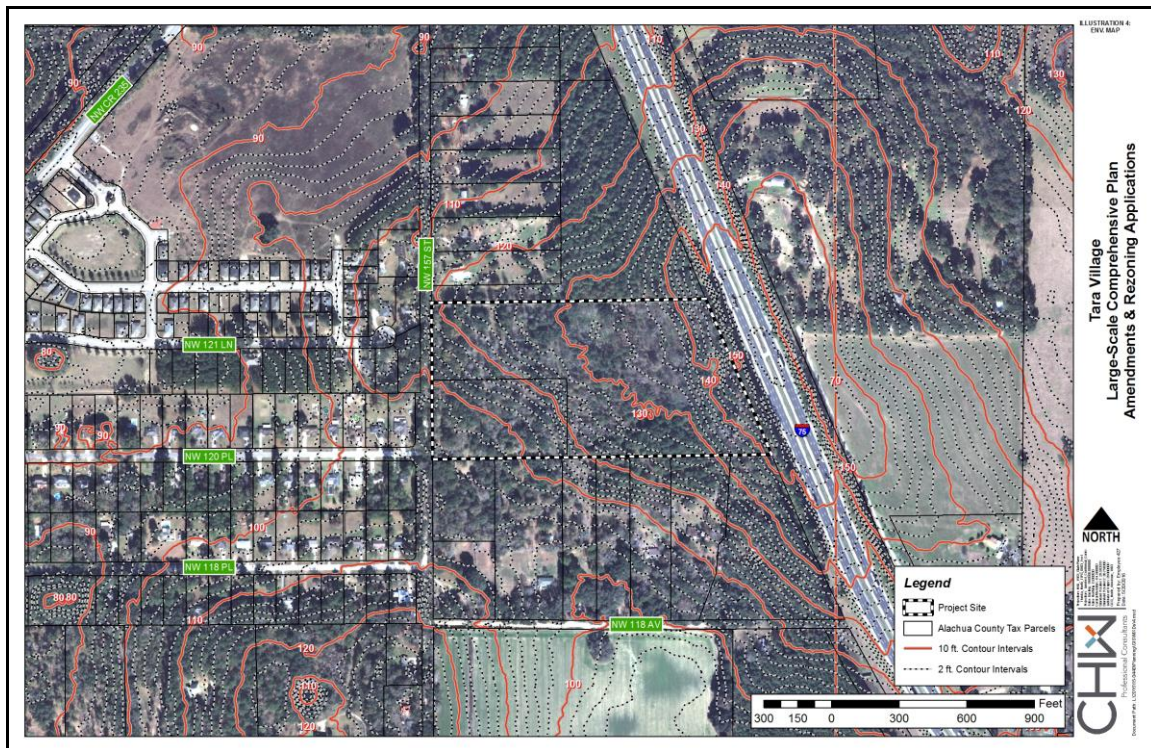

Figure 6: Wetlands, Flood Zones, and Topography

Stormwater management facilities for additional on-site development shall be constructed in conformance with the Stormwater Management Standards defined in LDR section 6.9.3. Post-development runoff rates will not exceed pre-development runoff rates. These facilities will meet all applicable Federal, State, and local requirements for stormwater treatment and retention. Stormwater system permits will be coordinated with the Suwannee River Water Management District and the State of Florida Department of Environmental Protection.

2. Preserves open space and natural lands and provides for public open space and recreation needs.

Response: As previously stated, the concurrent Tara Village Planned Development contains more than 30% dedicated open space, equating to approximately seven (7) acres. These seven (7) acres are available for both passive and active recreation opportunities.

3. Promotes the efficient and cost effective provision or extension of public infrastructure and services.

Response: The Tara Village Planned Development will utilize existing public facilities proximate to the site. There is a 6" pressurized water main along the site's western boundary. Sanitary sewer will be extended approximately 340 ft. from Savannah Station easterly to the site. The sewer extension will run south from Savannah Station through the existing NW 157th Street right-of-way to the project boundary.

4. Preserves agricultural areas and activities.

Response: The Tara Village project will not result in the loss of active agriculture area or activities. Although the site currently has an Agriculture zoning designation, it does not support any active agricultural activities.

NEEDS ANALYSIS

Introduction

Tara Village, Inc. proposes to develop two (2) parcels totaling approximately 21.64 acres with a maximum development potential of 20 single-family units. The Tara Village development will be a rural character, larger-lot single-family subdivision, with a gross density of 0.93 units per acre.

Demographics

According to the Bureau of Economic and Business Research (BEBR) April 2015 population estimates, Alachua County's population is 253,603¹. Based on the same BEBR report, the City of Alachua's estimated population is 9,788. This equates to approximately 281.7 persons per square mile and an estimated total households of 4,147. The total household estimate is derived by using 2.36 persons per dwelling unit which is the most recent concurrency standard used by the City of Alachua staff.

The majority of Alachua's population lives in single-family homes. According to the City's 2010 Evaluation and Appraisal Report (EAR), Alachua's housing stock is comprised of 75% single-family housing units. Further, the majority of households own their home, with 2010 homeownership rates topping 78%, as compared to only 69% statewide². This is the most currently available data for housing stock and homeownership and is still believed to be accurate based on the types of residential development within the City since 2010.

Historic Demographic Trends

As is the case with Florida at large, Alachua's population has been increasing, primarily due to in-migration, as opposed to a population increase due to the birth rate outpacing the number of deaths. This is evidenced by the population increase rates far outpacing an increase in persons per household³.

According to the 1990 and 2000 US Census, Alachua's population grew from 4,529 to 6,098, an increase of approximately 35%. Between 2000 and 2010, Alachua saw an increase in the population growth rate as well as an increase in population numbers. Between 2000 and 2010, Alachua's population grew from 6,098 to 9,139, an increase of almost 50%. Between 2010 and 2015, Alachua's population grew from 9,059 to 9,788, an increase of 8% over the five-year period. Essentially, this means that the actual growth rate for this 25 year period (1990 - 2015) grew by ±116%.

Future Needs

According to the Bureau of Economic and Business Research (BEBR) April 2015 population estimates, Alachua County's population is 253,603. Based on the same BEBR report, the City of Alachua's estimated population is 9,788. Growth

¹ Source: Bureau of Economic and Business Research (<https://www.bibr.ufl.edu>)

² Source: US 2015 Census (www.census.gov)

³ Source: US 1990, 2000, and 2010 Census (www.census.gov)

projections within Alachua County over the next 30 years range from 5,097 (BEBR Low) to 127,197 (BEBR High) new residents. The BEBR Medium projection estimates a population growth of 64,897 by year 2045. BEBR does not project growth on a municipality level.

The City of Alachua currently represents $\pm 4\%$ of the total County population. If calculated so that the City of Alachua maintains $\pm 4\%$ of the County's overall population, the City of Alachua will receive approximately 2,952 additional residents by 2045 based to BEBR Medium projections. Since the City of Alachua has frequently outpaced average population growth within Alachua County, it is anticipated that this estimate is conservative. This analysis anticipates the City of Alachua's population will grow to 11,984 by 2035 and 12,740 by 2045⁴.

Using the City's concurrency standard of 2.36 persons per dwelling unit and BEBR Medium projections, approximately 5,077 dwelling units will be required to meet the housing demand by 2035, and 5,398 dwelling units will be necessary to meet the demand by 2045. Using the estimated number of City of Alachua households in 2015 of 4,147, an additional 930 dwelling units will be necessary by 2035, and 1,251 additional dwelling units by 2045.

The City's housing supply, as identified in the 2010 EAR, is comprised of 75% single-family dwelling units⁵. Assuming this percentage does not change, of the 930 additional dwelling units necessary by 2035 to satisfy housing demand, Alachua's housing market will require 698 additional single-family units. Again, assuming this percentage does not change, of the 1,251 additional dwelling units necessary by 2045 to satisfy housing demand, Alachua's housing market will require 938 additional single-family units.

CONSISTENCY WITH THE COMPREHENSIVE PLAN

FUTURE LAND USE ELEMENT (FLUE)

FLUE Policy 1.2.a: Moderate density residential (0 to 4 dwelling units per acre): The moderate density residential land use category allows residential development at a maximum density of 4 dwelling units per acre.

Response: The MOD allows for a maximum density of up to four (4) units per acre. This Comprehensive Plan text amendment limits density to 0.93 unit per acre, substantially less than the maximum allowed by the MOD FLU category.

FLUE Goal 2: Innovative Design Standards: The City shall utilize innovative design standards to discourage urban sprawl, provide aesthetic standards, promote open space and preserve rural character. In an effort to reduce the impacts of urban sprawl on the community and the region, the City of Alachua shall provide for a wide array of planned developments to encourage the creation of interrelated neighborhoods and districts to increase the quality of life for all residents of the City.

Response: The proposed text amendment and Tara Village Planned Development restrict the project to densities consistent with surrounding development, provide strategically placed open space, and help meet a demand for larger single-family residential lots in the City of Alachua. Additionally, the Tara Village Planned Development will assist with improving NW 157th Street to allow for more convenient and safe connectivity from the site north to County Road 235. Neighboring properties will benefit from this, as NW 157th Street is currently not improved to City standards.

FLUE Objective 5.2: Availability of facilities and services: All new development shall be planned and constructed concurrently with the availability of facilities and services necessary for the development.

TRANSPORTATION ELEMENT (TE)

TE Objective 1.1: Level of Service: The City shall establish a safe, convenient and efficient level of service standard for all motorized and non-motorized transportation systems.

Response: The density permitted by the proposed text amendment will not result in a degradation of transportation LOS standards. The Tara Village Planned Development will generate fewer than 1,000 Average Daily Trips (ADT). Per LDR section 2.4.14(H)(2)(b)(i), affected roadway segments are those that fall within one-half (½) mile of Tara Village Planned Development's boundaries. County Road 235 from Alachua's southern limits to County Road 241 is the only affected roadway segment monitored for concurrency that is accessible within ½ mile of the project's boundary.

I-75 falls within the ½ mile radius, but the nearest interchange is ±2.5 miles to the north at US 441.

According to the most recent Development Monitoring Report made available by City staff, there are 10,380 available AADT and 915 available Peak Hour trips for County Road 235. Therefore, post adoption of the Tara Village LsCPA there will continue to be a substantial surplus of available trips.

*COMMUNITY FACILITIES AND NATURAL GROUNDWATER RECHARGE
ELEMENT (CFNGAR)*

CFNGAR Policy 1.1.d: The City hereby establishes the following level of service standards for sanitary sewer facilities:

b. Quantity: System-wide wastewater collection and treatment will be sufficient to provide a minimum of 250gallons per day per equivalent residential unit (ERU) on an average annual basis.

Response: The density permitted by the proposed text amendment, 20 single-family units, would demand 5,000 gallons per day of sanitary sewer capacity. Currently, there is surplus capacity of 798,890 gallons per day.

CFNGAR Objective 4.1: Achieve and maintain acceptable levels of service for potable water quantity and quality.

CFNGAR Policy 4.1.c: The City establishes the following level of service standards for potable water:

2. Quantity: System-wide potable water distribution and treatment will be sufficient to provide a minimum of 275 gallons per day per equivalent residential unit (ERU) on an average annual basis.

Response: The density permitted by the proposed text amendment, 20 single-family units, would demand 5,500 gallons per day of potable water capacity. Currently, there is surplus capacity of 1,055,450 gallons per day.

Objective 2.1: Continue to ensure satisfactory and economical solid waste service for all City residents, with an emphasis on reuse and recycling.

Policy 2.1.a: The City hereby establishes the following level of service standards for solid waste disposal facilities:

FACILITY TYPE	LEVEL OF SERVICE STANDARD
Solid Waste Landfill	.73 tons per capita per year

Response: The density permitted by the proposed text amendment, 20 single-family units, will demand ±34.46 tons of available capacity per year. Currently, there is a 50-year build-out capacity.

RECREATION ELEMENT (RE)

RE OBJECTIVE 1.2: Facilities, Levels of Service and Hierarchy of Parks. The City shall provide a variety of recreational facilities and opportunities that respond to appropriate levels of service for the established hierarchy of parks.

RE Policy 1.2.b: The City shall adhere to a minimum level of service of five (5.0) acres of community, neighborhood or pocket park, per 1,000 persons, with a minimum of 20 percent of this in improved, passive parks.

Response: The density permitted by the proposed text amendment, 20 single-family units, will demand 0.24 acres of available recreation capacity per year. Currently, there are 39.21 acres of available recreation capacity.

PUBLIC SCHOOL FACILITIES ELEMENT (PSFE)

Objective 2.2: Level of Service Standards. The City shall ensure, in coordination with the SBAC, that the capacity of public schools is sufficient to support new residential subdivisions, plats and/or site plans at the adopted level of service (LOS) standards within the period covered by the five-year schedule of capital improvements. After the first 5-year schedule of capital improvements, capacity shall be maintained within each year of subsequent 5-year schedules of capital improvements.

Policy 2.2.b: Level of Service (LOS) Standards: The uniform, district-wide LOS standards shall be 100% of Permanent Program Capacity (see definition) for elementary, middle, and high schools.

Response: The density permitted by the proposed text amendment, 20 single-family units, will demand three (3) student stations in elementary, one (1) in middle, and two (2) in high schools. A Public School Generation Form for Residential Development in the City of Alachua has been submitted with the LsCPA and PD-R rezoning applications. The estimated student generation information will be reviewed by Alachua County Public Schools for compliance with the school concurrency management program and inter-local agreement.
