

1. The development shall consist of the following Development Areas: Single-Family Residential (A); Circulation (B); and Common Area/Open Space (C). The density, intensity, allowable uses, acreage, and dimensional standards, where applicable, for each Development Area are as follows:

Development Area and Density	Allowable Uses	Permitted Intensity	Acres	Dimensional Standards	Percentage of PD
<p>Single-Family Residential (A) <i>20 dwelling units</i></p>	<p>Allowed Residential Uses within the PD-R Zoning District per Table 4.1-1 of the City's LDRs, including Single-Family Detached</p>	<p>20 Dwelling Units</p>	<p>±13</p>	<p>Single-Family Detached Minimum Lot Area – 21,000 square feet Minimum Lot Width - 75 feet Setbacks: Front - 15 feet Side – 7.5 feet Rear - 30 feet</p> <p>Maximum Building Height - 45 feet Maximum Lot Coverage - 50%</p>	<p>±60%</p>
<p>Circulation (B) <i>N/A</i></p>	<p>Roadways, Parking, Driveways, Bicycle & Pedestrian Pathways, and Supportive Infrastructure Improvements</p>	<p>N/A</p>	<p>±1.7</p>	<p>Streets with Curb and Gutter Minimum Right-of-Way Width - 50 feet Minimum Wearing Surface - 24 feet</p> <p>Streets with Swales Minimum Right-of-Way Width - 60 feet Minimum Wearing Surface - 24 feet</p>	<p>±9%</p>
<p>Common Area/Open Space (C) <i>N/A</i></p>	<p>Public or Private Parks, Recreational Trail, Resource-Based Recreation, Non-Intensive Communication/ Public Infrastructure</p>	<p>N/A</p>	<p>±6.9</p>	<p>N/A</p>	<p>±31%</p>

2. The ingress/egress point to the Property defined in Exhibit "A" shall be located as depicted on the PD Master Plan. The design of the proposed roadway shall be consistent with the applicable standards of Article 7 of the City's LDRs. The design of the proposed roadway shall be reviewed and approved as part of the subdivision review process as further defined in Section 2.4.10 of the City's LDRs.

3. The Owner/Developer shall contribute funding in the amount of \$30,000 ("Contribution") to a planned roadway improvement ~~project~~ to apply surface treatment (i.e., "chip-sealing" or an asphaltic pavement surface) to NW 157th Street. The ~~funding contributed by the Owner/Developer~~ Contribution shall offset costs associated with the improvement of NW 157th Street from its intersection with County Road 235 to the southern boundary of the Project. The Owner/Developer shall provide ~~payment~~ the Contribution to the City upon the earliest of the following events:
 - a. Prior to Owner/Developer submitting Construction Plans pursuant to Section 2.4.10(G)(3) of the LDRs for any part of the Project; or
 - b. ~~Twenty four (24)~~Two (2) months after the City Commission's adoption of this Ordinance.

4. ~~No development application for development on the Property shall be accepted by the City unless the Contribution has been made to the City.~~

5. ~~If the City does not begin the roadway improvement to apply surface treatment (i.e., "chip-sealing" or an asphaltic pavement surface) to NW 157th Street within 24 months of the adoption of this Ordinance, the City shall return the Contribution to the Owner/Developer and the City shall not be under any obligation to construct these improvements to NW 157th Street. In the event the City does not begin this roadway improvement within 24 months and the City returns the contribution to the Owner/Developer, paragraph 4 above shall no longer apply to the Project. Thereafter, the Owner/Developer shall be responsible for complying with all required roadway improvements to NW 157th Street to meet the City's Code of Ordinances, LDRs, or any other applicable criteria for any development on the Property.~~

6. The adoption of this Ordinance does not guarantee the approval of any development permits, including but not limited to, a Preliminary Plat, Construction Plans, or a Final Plat for the Project, or for any part or section thereof, for the Owner/Developer or its successors or assigns.

~~4.7.~~ In order to provide for compatibility of the Project with the densities of contiguous and nearby properties, the Project's development shall maintain a minimum 25 foot natural buffer along the Project's property boundary lines. The natural buffer shall remain undisturbed in all areas and in its natural state, except where necessary to provide ingress/egress, stormwater management facilities, and/or utility service to the Project. Stormwater management facilities shall not be placed within the 25 foot natural buffer area along the eastern property boundary line or along the southern property boundary line of the Project, and shall only be placed within the 25 foot natural buffer area along the north property boundary line or west property boundary line if required to meet design constraints. Should stormwater management facilities be placed within the 25 foot natural buffer area, landscaping shall be planted along the perimeter of the stormwater management facility where adjacent to a property boundary line of the Project to meet the requirements of a Type D "Opaque" buffer as defined by the City's LDRs. Any landscaping as required by this section shall use trees from Appendix 6.2.2-A of the City's LDRs, Recommended Tree/Plant List.

~~5.8.~~ The Project shall be subject to the following maximum densities/intensities:

- a. A maximum of 20 single-family dwelling units shall be permitted within Development Area "Single Family Residential (A.)"

~~6.9.~~ If any wetlands are identified on the Property defined in Exhibit "A", such areas shall be field-delineated using professionally accepted methodology. All development in and/or near wetland and conservation areas shall be consistent with the City's Comprehensive Plan and in compliance with the City's LDRs, as may be amended from time to time, and shall grant conservation easements or other appropriate protective mechanisms, as determined by the City, to protect wetlands and conservation areas.

~~7.10.~~ Each new Final PD Plan shall be consistent with the Goals, Objectives, and Policies of the Comprehensive Plan, as it may be amended from time to time, related to the eradication of invasive exotic plant species.

~~8-11.~~ The Owner/Developer shall, concurrent with development of the Project, remove and destroy all Category I and II exotic plant species, as published in the most current version of the Florida Exotic Plant Council's List of Invasive Plant Species, located on the Property defined in Exhibit "A". Thereafter, the Owner/Developer shall assure long-term implementation of an exotic plants management plan approved with each new final development order and which shall be included in covenants and restrictions to be implemented by a properly structured property owner's association or other mechanism acceptable to the City.

~~9-12.~~ The planting of any species identified in the most current version of the Florida Exotic Pest Plant Council's List of Invasive Plant Species shall be prohibited. Grasses and sods shall be certified free of noxious weeds by the Florida Department of Agriculture and Consumer Services, Division of Plant Industry.

~~10-13.~~ The Owner/Developer shall utilize methods of minimizing impacts, such as appropriate Best Management Practices of the Suwannee River Water Management District, in order to reduce the potential for flash flooding, to avoid adverse impacts to water quality, and to incorporate existing drainage patterns to the greatest extent practicable. Upon approval from the City of Alachua and the Suwannee River Water Management District, enhancements may be permitted to the existing, natural conveyance system to mitigate for existing erosion and sedimentation, restoration of historical erosion and sedimentation damage, and preventing future adverse erosion and sedimentation.

~~11-14.~~ The Owner/Developer shall submit a utility system plan as part of the Construction Plans for the Project.

~~12-15.~~ Development on the Property defined in Exhibit "A" shall include the following requirements:

- a. Any roadways that are to be dedicated to the City shall be designed to meet the standards established by Section 7.3.1 of the City's LDRs, or any amendment thereto.
- b. The Owner/Developer shall design, permit, and construct a stormwater management system necessary to serve the Project. Stormwater management facilities shall be constructed concurrent with development of the Project. Sufficient stormwater capacity

for the Project consistent with Section 6.9.3 of the City's LDRs must be provided concurrent with site improvements of the Project. On-site soil shall be appropriately prepared so as to alleviate any drainage issues.

- c. Utilities shall be extended throughout the Project within areas designated as public right-of-ways, where practical. Utility infrastructure which must run outside the right-of-way, and which will be maintained by the City, shall be located in easements granting access and maintenance of such infrastructure.
- d. The Owner/Developer shall be responsible for the provision of infrastructure for the Project. This shall include all on-site improvements and off-site improvements, including but not limited to, transportation infrastructure improvements and/or modifications, deemed necessary to support the Project by the City, in the City's sole discretion.
- e. Facilities constructed on-site that are not dedicated to the City for maintenance shall be the responsibility of a legally established property owners' association. The property owners' association shall have the responsibility of maintenance of all common areas. In the event that common areas and required open space areas, as mandated by Sections 6.7.6, 6.9.3(E)(2), and 7.8.1 of the City's LDRs, or any amendments thereto, are not owned by a property owner's association, such areas shall be burdened by an easement that requires a property owner's association or another entity approved by the City to maintain such areas, and that restricts such areas in accordance with the City's requirements for such areas.

~~13~~16. Electric System Requirements:

- a. The Owner/Developer shall be responsible to connect to the electric system to serve the Project.
- b. Electric system design shall conform to National Electric Code regulations and National Electrical Contractors Association and National Electric Installation Standards guidelines for electric systems. The electric system design shall be performed by a professional engineer registered in Florida.

~~14~~17. Water System Requirements:

- a. The Owner/Developer shall be responsible to design, permit, construct, and connect to potable water system to serve the Project.
- b. Water systems shall be designed to provide fire flow rates that conform to the current standards of the Florida Fire Prevention Code, Chapter 633, Florida Statutes, and the Florida Building Code.

~~15-18.~~ 15-18. Wastewater System Requirements:

- a. The Owner/Developer shall be responsible to design, permit, and construct wastewater main extensions, and to design, permit, construct and connect to the wastewater system to serve the Project.

~~16-19.~~ 16-19. The Owner/Developer shall obtain all applicable permits from the Suwannee River Water Management District, the Florida Department of Environmental Protection, and/or any other Federal, State, or Local agency before the commencement of any development in the Project.

~~17-20.~~ 17-20. Each new Final PD Plan shall be a Preliminary Plat, and shall adhere to all requirements of this PD Ordinance, the City's Comprehensive Plan, and the City's LDRs. Each new Final PD Plan shall also adhere to all requirements of the PD Master Plan and the PD Agreement for this Project.

~~18-21.~~ 18-21. The Owner/Developer shall submit an open space plan as part of each new Final PD Plan. The open space plan shall meet the minimum requirements established by Section 6.7, *Open Space Standards*, of the City's LDRs, or any amendments thereto.

~~19-22.~~ 19-22. Open spaces and conservation areas shall account for a minimum of 31 percent of the complete Project and shall be located as depicted on the PD Master Plan.

~~20-23.~~ 20-23. Each new Final PD Plan shall include the exact number of residential units, as well as precise information regarding the layout of open space, circulation, and stormwater management.

~~21-24.~~ 21-24. Each new Final PD Plan shall contain detailed, quantitative, and site-specific standards regarding the location of any residential components, design standards, circulation scheme, parking facilities, utilities system design, open space design, landscaping, and stormwater management facilities, as applicable to the portion of the Project subject to each new Final PD Plan.

~~22:25.~~ The development parameters defined herein do not inordinately burden the development of the Property defined in Exhibit “A”.

~~23:26.~~ The rezoning of the Property defined in Exhibit “A” does not reserve concurrency for the Project.

~~24:27.~~ All development, including but not limited to new Final PD Plans for the Project, shall be governed by the laws, regulations, City’s Comprehensive Plan, City’s LDRs, and ordinances in effect at the time of the specific proposed development, and not as of the date of this Ordinance.
