Tara,

In follow-up to our conversation about AEDs. I spoke to a representative from Cardiac Science, the company we purchased our last AEDs from. He advised that the government price for the Powerheart G5 fully automatic defibrillator is \$1,495.00 per unit. The quoted price is a government price based off of a contract. The representative will follow up with a formal quote for 8 units. I am currently waiting to receive that quote and will forward it to you as soon as I have it.

Thanks,

**Sgt. Jesse Sandusky**
