# **Drug Companies Fear** Release Of New \$2 Sex Pill For Older Men

Men in clinical trial see huge boost in desire, strength of erections, and sexual activity without side effects.

NEW YORK - It's hard to believe that in America today an affordable pill that could improve the sex lives of millions of men is in danger of being vanked from the shelves. And it's just because big drug companies fear for their profits.

The pharmaceutical industry is desperately trying to stop shipments of the remarkable new "JackedUp" pill. Pharma is worried because men reporting increased sex drive, stronger erections and more stamina - all without the side-effects and \$40-per-pill price tag associated with drugs Viagra. Clinical results show men feel these benefits within just a few weeks of taking JackedUp's active ingredient.

The pill, made for men over 50, was released early last month. Despite Big Pharma's efforts, sales have already exceeded expectations.

taking the newly released \$2 pill called JackedUp. Clinical trials show active ingredient triggers surge in desire, strength of erections, and sexual activity in older men.

The testing was done on men 40 - 65 years and the results were remarkable. The men who took the ingredient active JackedUp reported major improvements in their sex lives. Their ability to get and keep erections went up by over 200%. Libido and sex drive surged. Even staying power and stamina during sex more than doubled!

"If you're over 50 and suffering from low sex drive, decreased stamina and inability to perform, low testosterone is the biggest factor. Drug companies do NOT want men to know about this affordable new pill..."

#### **Exciting Benefits**

There are very good reasons why sales are booming and companies want it gone. Apart from costing just two dollars per daily dose, the clinical results confirm JackedUp's active ingredient is very impressive. It greatly boosts a man's ability to get and keep erections. Stamina during sex also improves.

The product also has a unique ability to help men feel more passion, desire, and sex drive. These impressive benefits boosting come from testosterone levels by up to a whopping 193%. Doctors are astounded by

its effects. Why do drug companies want this pill stopped? Since the "JackedUp" pill is natural, drug companies can't patent it (like they did with Viagra) and make big profits. Plus, if you're over 50 and suffering from low sex drive, decreased stamina and inability to perform, low testosterone is the biggest factor. If you can safely boost your testosterone, you won't need their expensive pills. That's the very reason big business is trying to have it pulled from the shelves.

Testosterone Levels Before and After Taking the Active Ingredient in JackedUp

#### Strong Clinical **Results Worry** Big Pharma

Recent clinical trials on JackedUp's active ingredient have made the drug companies more desperate. The trial results were published in major medical journals, and doctors are now recommending JackedUp to patients.

Head product of development, Dave McNeill, said the big drug companies weren't worried at first. "They didn't care because the active ingredient can take a few weeks before many men really feel the benefits. But these awesome clinical trials really got their attention. They're learning A LOT of men will wait a few weeks if it means avoiding negative side effects and saving money."

#### **How It Works**

The "JackedUp" pill works by helping older produce more testosterone. It doesn't force dangerous fake testosterone into your body like injections do. Instead, it works with your body to produce testosterone naturally. And the results have been extraordinary. It's like your body reboots itself to feel like it did in the prime of your life.

#### Initial Users Are Thrilled...And Worried

"JackedUp has been awesome for my sex drive and performance! I'm worried it may not be available in the future. The idea that it may be taken away just to secure some big drug company's profits is very frustrating."

> Rob H., 49 years old, Colorado Springs, CO

"My wife and I were both sexually vibrant until I had prostate cancer. After my surgery we tried everything my doctor recommended but nothing worked. Within a few weeks of taking JackedUp, everything has been functioning beautifully and we've been riding high ever since!"

> - Ken S., 78 years old, Phoenix, AZ

### **Doctors Speak Out**

Drug companies concerned are also

that doctors are now recommending JackedUp. The active ingredient has strong clinical results and lacks the side effects seen in current drugs on the market. This makes it an easy option for doctors to suggest.

Dr. Laguna-Bedia, a specialist in internal medicine says, "A lot of men think their lack of interest and inability to perform are simply parts of aging. This is just not true. JackedUp can help these men regain a healthy appetite for sex and the physical ability to perform."

"JackedUp works by boosting key male hormones without side effects. The benefits of these hormones to sexual health are well known, but they actually do more than that. Men also report more energy, less body fat and higher motivation," said Dr. G. Pereira, a renowned surgeon in Florida.

Dr. Jacob Moss notes, "I recommend JackedUp if you're struggling with getting and keeping erections or low libido. It's also a great option for men who want to last longer and have more control over when they orgasm."
