### INTRODUCTION TO FISCAL ANALYSIS REPORT

#### **Purpose**

The fiscal analysis report is used to report the operating condition of the City, and where applicable, identify potential trends and, if necessary, recommend options for corrective action. The report first looks at all City Funds, and then looks at the major fund types (General Fund, Enterprise Funds, etc.). This report is merely a snapshot that fairly represents the City's financial position at a given point in time. While materially accurate, these are unaudited figures.

#### **Defining Revenue**

Revenues are the financial resources available to the City. The City of Alachua has a variety of revenue sources. These revenue sources include taxes, permits and fees, charges for services, fines and forfeitures, grants, and other miscellaneous revenues.

### **Defining Expenditure**

Expenditures constitute a use of financial resources. There are four basic types of expenditures: personal services, operating, capital and debt. Personal services include all salary and salary related expenditures. Operating expenditures include the day-to-day expenses such as supplies, utilities, and equipment purchases. Capital expenditures include construction of roads, parks, buildings and the purchase of land. Debt is the expense related to principal and interest on long-term bonds and notes issued by the City. Expenditure figures within this report include encumbrances. Encumbrances are expenditure commitments that have not yet been actually incurred.

#### **Defining Expenditure Function**

Expenditure functions are expenditure classifications according to the principal purposes for which expenditures are made. Examples are general government, public safety, economic environment, physical environment, transportation, and culture/recreation.

#### **Defining Fund Balance**

Fund balances are the funds carried over from the previous fiscal year. The City has a variety of uses for fund balance including reserve for future capital projects, for emergencies and catastrophes, for certain bond issues, and for other contingencies and expenditures.

#### Conclusion

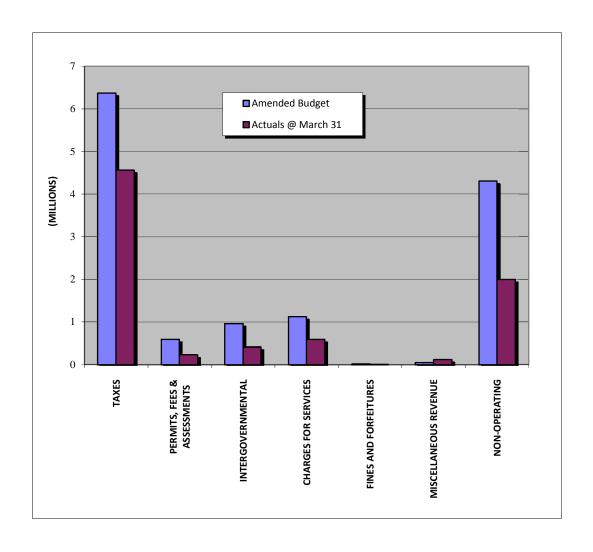

The report gives a more comprehensive view by fund type of the financial operations of the City. The Finance and Administrative Services Department welcomes any feedback you may have.

**FUND 001 - GENERAL FUND:** The General Fund is the general operating fund for the Alachua City Commission. This fund is used to account for all financial resources, except those required to be accounted for separately. These resources provide funding for programs such as Fire Services, Recreation Services, General Government Administration, Capital Improvement Projects, Law Enforcement and Planning Services to all residents of the City of Alachua.

### **INVESTMENTS AND CASH**

### **Purpose**

The purpose of this section is to report the City's cash and investment holdings at the end of each month. These funds are managed in accordance with the City's Investment Policies, which are designed to ensure the prudent management of public funds, the availability of operating and capital funds when needed, and an investment return competitive with comparable funds and financial market indices.

#### **Investment Objectives**

The foremost objective of the City's investment program is the safety of the principal of those funds within the portfolios. The portfolio is managed in a manner that funds are available to meet reasonably anticipated cash flow requirements in an orderly manner. The portfolio is designed with the objective of attaining a market rate of return throughout budgetary and economic cycles, taking into account the investment risk constraints and liquidity needs. However, return on investment is insignificant in comparison to the safety and liquidity objectives described above. The City's core investments are limited to relatively low risk investment instruments in anticipation of earning fair return relative to the risk being assumed.

#### **Defining Principal**

Principal, when dealing with investments, can be defined as the original amount invested in a security.

#### **Defining of Portfolio**

A portfolio can be defined as various investment instruments possessed by an individual or organization.

#### **Defining Rate of Return on Investment**

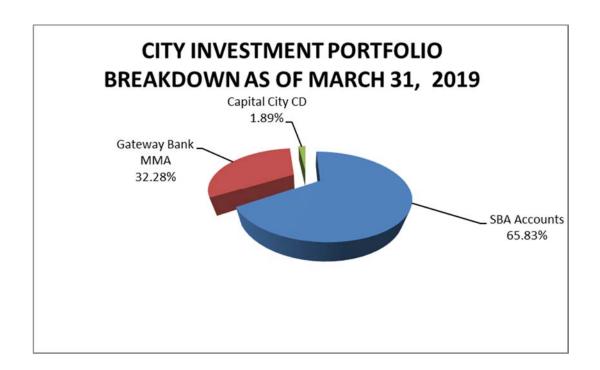

The Rate of Return on Investment refers to the benefits (the profits) to an investor or organization relative to the cost of the initial investment. It is similar to the rate of profit as a measure of profitability.

#### Conclusion

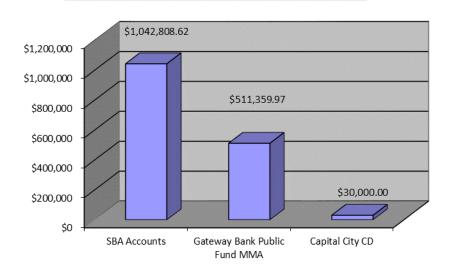

The City's cash and investments are pursuant to Section 218.415, Florida Statutes as well as the City's own adopted Investment Policy. To ensure that the City's funds are effectively managed, the Finance Director and other appropriate staff shall annually complete eight (8) hours of continuing professional education in subjects or courses of study related to investment practices and products.
